محاضرة power app

The screenshot shows the Power Apps portal interface. On the left is a navigation menu with options like Home, Learn, Apps, Create, Dataserve, Flows, Chatbots, AI Builder, Cards (preview), and Solutions. The main area is titled 'Apps' and contains a table with columns for 'Name' and 'Modified'. The table lists several apps, including 'aida1010', 'welcome', 'تطبيق حساب العمر', 'اختر اسم الصورة', 'اله حاسبه 2022', 'Choose the correct word', 'مشروع مجمع', and 'aida mohamed saed'. A 'Component libraries' section is also visible above the table.

Name	Modified
aida1010	2 h ago
welcome	3 d ago
تطبيق حساب العمر	2 wk ago
اختر اسم الصورة	2 wk ago
اله حاسبه 2022	2 wk ago
Choose the correct word	2 wk ago
مشروع مجمع	3 wk ago
aida mohamed saed	3 wk ago

محاضرة power app

The screenshot shows the Power Apps canvas editor. At the top, there's a toolbar with 'OnSelect' and 'fx' buttons. The main canvas displays a calculator app with two input fields containing '50', a 'نتائج' (Results) label showing '100', and several buttons including '+', '-', '*', '/', and 'clear'. On the left is a 'Tree view' showing the app's structure with 'Screen1' containing various buttons and text inputs. On the right, the 'Properties' pane for 'Button1_4' is open, showing the 'Advanced' tab with a formula: `Set(a,TextInput1.Text*TextInput2.Text);`. The formula bar at the top also contains this code.
